YANMAR Engine Model Number: L100AE
This information has been extracted out of the Yanmar engine operators manual No. 114250-0004E. For additional information see the complete Yanmar Manual.

NEW ENGINE WARNINGS

While your engine is still new, applications of heavy loads may shorten the life of the engine. Follow the breaking-in procedures during the first 20 hours.

1. Avoid overloads
Avoid applying any heavy load during the breaking-in period.

2. Change engine oil regularly
Change the engine oil at 1st 50 hours or at the end of the first month, and every 3 months or 200 hours thereafter.

Note: Be sure to drain the oil while the engine is warm. When cold, it may be difficult to drain the oil completely.

FUEL REQUIREMENTS

1. Selection of fuel oil
Only use the diesel fuel which is most suitable for the engine.

2. Keep dust and water out of the fuel
When filling the fuel tank from drums, make sure that no dust or water are mixed in the fuel. This may lead to serious fuel injection pump and nozzle problems.

CAUTION:
- Only use the recommended diesel fuel oil. Use of non-recommended fuel may cause the engine damage.
- Fuel should have a cetane value of more than 45 in order to prevent difficult starting, mis-firing, and white exhaust smoke.
- Diesel fuel oil substitutes are not recommended; they may be harmful to the fuel system components.
- Fuel should be free of water or dust because these cause trouble in the fuel injection pump and nozzle.

- Refuel in a well ventilated area with the engine stopped.
- Do not smoke or allow flames or sparks in the area where the engine is refueled or where gasoline is stored.
- Be careful not to spill fuel when refueling. If any fuel is spilled, make sure the area is dry before starting the engine.

+ WARNING:
The engine may be damaged if operated with insufficient lube oil. It is also dangerous to supply too much lube oil to the engine because a sudden increase in engine rpm could be caused by its combustion. Always check the lube oil level before starting the engine and refill if necessary.

OIL REQUIREMENTS

Use proper lube oil preserve your engine
Nothing affects the performance and durability of your engine more than the lube oil you use. If inferior oil is used, or if your engine oil is not changed regularly, the risk of piston seizure, piston ring sticking, and accelerated wear of the cylinder liner, bearing and other moving components increases significantly. Your engine life may be seriously shortened. Yanmar recommends CC/CD oil of API engine service classification. Always use oil with the right viscosity for the ambient temperature in which your engine is being operated. Use the chart on this page when choosing your engine oil.

ENGINE OIL
YANMAR recommends A. P. I. engine service classification of CC or CD. Always use oil with the right viscosity for the ambient temperature in which your engine is being operated.

HUILE POUR MOTEUR
YANMAR recommande l'huile CC ou CD du classement d'entretien pour moteurs A. P. I. (Institut américain du pétrole).
Utiliser toujours une huile avec une viscosité appropriée à la température ambiante dans laquelle le moteur doit être utilisé.
Employer le graphique mentionné ci-dessus lors du choix de l'huile pour le moteur.

MOTORÖL
YANMAR empfiehlt Motoröl der A. P. I. Motor-Wartungsklassifikation von CC oder CD.
Innerhalb der richtigen Viskosität für die entsprechende Umgebungstemperatur wählen, bei welcher der Motor betrieben wird.
Bei der Wahl des Motorenöls ist auf die rechts stehende Tabelle Bezug zu nehmen.

ACEITE DEL MOTOR
YANMAR recomienda usar aceite CC o CD de la clasificación "A. P. I. Engine Service". Utilice siempre aceite de viscosidad adecuada para la temperatura ambiente a la que funciona el motor.
Use el gráfico del lado derecho para elegir el aceite de su motor.

OIL MOTORE
YANMAR raccomanda l'uso di olio di classe CC o CD, secondo la classificazione A. P. I. riguardante la temperatura del motore. Usare sempre olio con viscosità appropriata a temperatura dell'ambiente in cui il motore dovraoperare.
Per la scelta dell'olio motore, usare il diagramma riportato a destra.
YANMAR Engine Model Number: L100AE

Fill the oil up to the mouth of the filler port with the engine placed on the level.
Remplir jusqu'au sommet de l'orifice de remplissage avec le moteur nivelé.
Bei auf gerader Fläche stehendem Motor bis zur Oberkante des Einfüllloches zufüllen.
Relleno hasta la parte superior del orificio de relleno con el motor nivelado.
Rimpienso fino alla sommità del foro di introduzione con il motore in piano.

* When checking the oil level, make sure your engine is sitting level. If it is tilted, you may add either too much or too little oil. If you overfill, your engine will consume too much oil and the oil temperature will become dangerously high; if you do not add enough oil, your engine could seize up.
* When checking the oil, simply dip the dipstick into the oil pan. Do not screw in the dipstick.
* Be sure to check the engine on a level surface with the engine stopped.

**AIR CLEANER REQUIREMENTS**

(1) Loosen the wing nut, detach the cover of the air cleaner and remove the element.
(2) Reattach the cover of the air cleaner and tighten the wing nut.
(1) Desserrez l'écrou à reglette, détacher le couvercle du filtre à air et enlever l'élément du filtre.
(2) Fixez de nouveau le couvercle du filtre à air et serrez l'écrou à oreilles.
(1) Die Flügelmutter lösen, den Lufthitzerdeckel entfernen und den Filtereinsatz herausnehmen.
(2) Den Luftfilterdeckel wieder aufsetzen und die Flügelmutter festziehen.
(1) Aflojar la tuerca de mariposa, separar la cubierta del filtro de aire y remover el elemento de filtro.
(2) Fijar de nuevo la cubierta de filtro de aire y apretar la tuerca de mariposa.
(1) Per la manutenzione del filtro aria svitare il dado, togliere il coperchio e la cartuccia.
(2) Inserire nuovamente il coperchio e riavvitare il dado.

⚠️ CAUTION: — PRECAUTION: — VORSICHT: — PRECAUCION: — ATTENZIONE:

- Do not wash the air cleaner element with detergent because the element is oil-soaked Type.
- Replace the element when output decreases or bad exhaust color is noticed.
- Never run the engine without the air cleaner element. Rapid engine wear may result.
