The Guest 2701A is an IP67 waterproof, shock resistant, on-board marine battery charger. Energy saving mode automatically shuts off charger when battery is charged. Built in safety includes short circuit, over voltage, over current, and reverse polarity.

The Guest 2708A is a fully automatic 5-Stage, IP67 100% fresh and saltwater waterproof and shock resistant, on-board marine battery charger. Built in safety includes reverse polarity, over-current, over-temperature, and ignition protection.

The Guest 2707A is fully automatic 5-Stage, IP67 100% fresh and saltwater waterproof and shock resistant, on-board marine battery charger. Built in safety includes reverse polarity, over-current, over-temperature, and ignition protection.

The DSE9461 can be programmed for different charging curves to maximize the life of the battery using a 3-stage charging profile with adjustable current limit (Max 10A). This model can be used as a battery charger, power supply or both at the same time. Analog voltmeter and ammeter along with LCD display allow easy monitoring of the charging system. A battery failure contact is linked to the digital genset controller to indicate a loss of power to charger. Required for NFPA110 applications.
